

PolySource Joins GEPA, (Global Engineering Plastics Alliance) to Provide Customer Global Coverage

Kansas City, Missouri, USA – October 11, 2016 – PolySource, is pleased to announce a global partnership, **GEPA, (Global Engineering Plastics Alliance)** with ClickPlastics AG Bensheim, Germany, and Guangzhou Skyjoy Chemical Co. Ltd., based in Guangzhou, China. This alliance was developed to provide existing and new customers, including OEM and Automotive Tier 1, seamless, global program support, customer service, product availability and technical support.

“As all three companies are trying to service customers globally, it became apparent that the best way to accomplish global coverage was together as a team”, stated Greg Jacobson, President & CEO of PolySource. “We can now leverage the strengths of each of our businesses to support customers....globally”, added Jacobson.

“Customer internal communication thereby is simplified, because our key account team is involved in the complete communication with all stakeholders, and is always up to date. As a result, we have synergy effects and are always able to keep customers up to date,” said CMO Ralf Eberle, ClickPlastics AG.

PolySource, an application development based distributor, was founded in 1993. The focus of its business is on delivering resin solutions to customers whether their need is stocked material, application development, process support or alternative resin searches. Through its direct sales team, customer service team, and network of warehouses and logistics partners, PolySource is well positioned to support the growth opportunities in Mexico.

ClickPlastics, are specialists for a wide-range of products, from commodities to high-performance polymers. As the exclusive European representative for large Asian plastic manufacturers, they offer intelligent solutions in plastic. Their team of experts have years of experience in the plastics industry, and are able to offer customers a full range of services - project planning, material selection, tool consulting, mold design, delivery of the material, assistance in processing, and material handling.

Guangzhou Skyjoy Chemical Co., Ltd., located in China's manufacturing city of Guangzhou Luogang District, is an injection and plastic raw material trading, research and development, production and

sales of integrated enterprise. The company's main products include; various plastics and plastic additives. Products are widely used in electronics, household appliances, lighting, bathrooms, toys, and sporting goods sectors.

You can meet the GEPA members at the ClickPlastics booth **K show at hall 6 booth 6E80** and you can also find more information at:
