

Kansas City, Missouri, USA – August 11, 2016 – PolySource, LLC is proud to announce another significant milestone on its journey to become the premier provider of engineered resins in the plastics industry. The Company has achieved ISO 9001:2008 certification from the International Organization for Standardization. ISO certifications are awarded to organizations that consistently comply with international standard requirements for ensuring quality management systems.

PolySource implemented a robust quality management system to guide and govern its operations from top to bottom. This new system, and its recognition/certification by the International Organization for Standardization, is an important step in ensuring that customers continue to receive the very best in quality and service from PolySource.

“We are extremely proud of our team and their efforts to attain the ISO 9001:2008 certification“, states Greg Jacobson, President & CEO of PolySource. “It means that quality is just not a concept, but a reality. Our policies and procedures document that, but our people show it in how they work, and particularly in how they engage with our customers.

PolySource, LLC, founded in 1993, has focused its business on delivering resin solutions to customers whether their need is stocked material, application development, process support or alternative resin searches. Through its direct sales team, customer service team, and network of warehouses and logistics partners, PolySource is well positioned to manage the needs of its customers.
