PolySource Meeting Customer Demands with Growing Technical Sales Team

March 26, 2018

Kansas City, MO: PolySource is meeting increasing customer technical support demands by expanding their technical sales team with the addition of two Technical Application Development Managers and a Technical Application Development Specialist. Recognized as a leader in engineered plastic resin solutions, PolySource manages the needs of customers through its experienced technical sales force. “As an application development focused business, it’s imperative for our field team to bring a deep understanding of new application developments and existing applications where a problem or issue may exist. With the addition of Chad Miller, Kyle Attebury, and Laura Myers, PolySource further strengthens our commitment and position to provide a consultative approach to every customer interaction, providing hands-on information and recommendations”, states PolySource Director of Sales & Marketing, Bob Findlen.

Chad Miller, Technical Application Development Manager joins PolySource with 10 years of plastic expertise as a project engineer, account manager, and material manager. He will manage the Kentucky, Ohio, Tennessee, and Indiana territories. Chad has a Bachelor of Chemistry from Bellarmine University located in Louisville, KY and is certified with Global Standards for Plastics-Injection Molding.

Kyle Attebury, Technical Application Development Manager comes to the PolySource team after accomplishing over 4 years of record growth with a privately-held custom compounder. Kyle brings extensive experience and knowledge with resolving customer’s technical issues from incumbent products. He will manage the Eastern Missouri, Illinois, and Southwest Indiana territories. Kyle attended Oakland City University and holds a Bachelor of Science in Business Administration.

PolySource supports young professionals in the plastics industry and is proud to announce the hiring of Laura Myers as Technical Application Development Specialist. Laura is a recent graduate of Ferris State University with a Bachelor of Science Degree in Plastics Engineering Technology.

PolySource, founded in 1993, is an applications development and materials supply company, assisting customers with mold design, processing, and materials selection as well as logistics and warehousing. PolySource is well positioned to manage the needs of its customers through its experienced technical sales force, customer service team, and network of warehouses. As a partner of GEPA, (Global Engineering Plastics Alliance) PolySource solves customer problems globally.
